RE: Southern Tier Senior Living Facility
Horseheads (T), Chemung (Co), NY
FE Project # 2014-054

Dear Mr. Gaylord:

The Southern Tier Senior Living Facility is proposing to connect to the existing 12-inch watermain located on Gardner Road in the Town of Horseheads. The facility service line will be a 6-inch ductile iron pipe. A 12"x6" wet tapping tee will be used to connect to the existing water main. A new 6-inch gate valve will also be installed on the service line.

Based on conversations between you and myself we understand that the watermain is located near the north edge of pavement, or just within the pavement. Gardner Road is a Village Road and the project has permission to work within the road right-of-way. Fagan Engineers will verify the water service installations, pressure test and disinfect the water main. We will provide the Village of Horseheads all testing results and a record drawing of the water service. We have included a partial set of drawings including the site plan, grading plan, utility plan, and water main details.

If you have any questions or comments, please feel free to contact me at (607) 734-2165, ext. 228.

Sincerely,

FAGAN ENGINEERS & LAND SURVEYORS, P.C.

Karl M. Schwesinger, P.E., CPESC
Project Manager
